People search opt-out log

Search each site for your phone number or address, opt out, then note it here. Check again every three or four months and send a new request if your details come back.

Site	Date opted out	Report address or ID	Confirmation	Checked again (date)

Also done

- Google Results about you set up, with notifications on (date): _____
- California only: DROP request sent (date): _____. Keep your 8-digit DROP ID private.

Remember

- Opting out is free. Give only what the form asks for.

- Opting out doesn't delete public records, and your details can show up in a relative's report.
